

LMC Data Corporation

GSA Contract Schedule 70 (GS-35F-0522V)

California CMAS Contract (30970-2711A)

Certified Small Business (SB)

Cage Code 44C28 – DUNS #363215232

Global Cloud Data Management

LMC Data is a Certified Small Business that provides comprehensive data availability and Data Protection-as-a-Service solutions including cloud backup, disaster recovery, mobile endpoint, and SaaS applications. Our robust suite of established technology partners maintain 20+ global data center locations, are SOC 2, HIPAA, and PCI compliant and offer custom managed and monitored services including 24/7 support. LMC's mission is to protect our customers data, 24/7, from anything – natural disasters, cyber theft, human error, system corruption.

All LMC solutions have proven their value in the private and public sectors.

Corporate Capabilities:

Securing/Enabling Fax Networks

Our solution, eFax Corporate, securely sends/receives Electronic Health Records (EHR) faxes online. Our eFax Corporate solution (available **exclusively** on our GSA contract) enables users to easily sign, edit and organize faxes digitally with the assurance that the services utilizes HIPAA/HITRUST compliant transport security.

Cloud Backup

LMC's solution, LiveVault, is the industry's most secure (256 AES), scalable, and easy-to-manage disk-based cloud backup and on-demand data recovery service (and available **exclusively** on our GSA contract) — ensuring **continuous** Backup-as-a-Service (BaaS) with fully managed and monitored 24/7 support. LiveVault replaces Tape - Removes the time, expense and possible human error in tape backup.

Disaster Recovery

Our all-in-one disaster recovery and online backup solution (VEEAM Cloud Connect) — offering fully managed and monitored DRaaS that replicates and protects data across multiple off-site secure servers and provides failover in the event of any emergent event. Cloud-Connect is designed for near instant failover capabilities for VM's that require aggressive RTO's/RPO's – and has the ability to failover and run in our cloud environment in minutes for both testing and DR.

Endpoint Protection

Our KeepItSafe Endpoint protection solution delivers a powerful endpoint backup, file sharing, collaboration, and data-loss prevention in one unified solution. Our KeepItSafe Mobile provides IT managers with the control they need to protect their enterprise against unforeseen data catastrophe.

Email Management

Partnering with Mimecast, LMC provides customers with the leading email management and cyber security solution for complete email, data and web security. Our solution provides automated email archiving and continuity while simultaneously preventing data leakage, phishing attacks and other cyber threats.

Customized Professional Services/Solutions

LMC Data offers professional services to customize related cloud backup and recovery solutions - for any type of environment; Exchange, Windows, VMware, Hyper-V to SQL servers, enterprise apps, mobile devices, cloud applications etc...
